GREEN BAY & WESTERN RAILROAD COMPANY "B" Debentures

The Net Earnings of the Railroad are sufficient to pay a substantial percentage on the "B" Debentures, after full payments on all prior claims. The payments to the "B's" are non-cumulative, and there is no provision for any trusteeship for the protection of these Debentures. It is therefore important that they should unite for their own protection. For the purpose of obtaining the income belonging to these obligations and securing their interests upon any transfer of the property, the undersigned, who represent a considerable amount of these Debentures, request the owners to deposit them, under the Agreement dated June 30, 1905, with the United States Trust Company, 45 Wall Street, New York, before August 1st, 1905. Copies of the Agreement may be obtained at the Trust Company.

Application will be made, as early as possible, for the listing of the Committee's Certificates on the New York Stock Exchange.

EDWARD L. ANDREWS. FRANCIS K. PENDLETON. Counsel.

LOUIS M. OGDEN, Secretary. 25 Broad Street, Room 718.

the announcement of the values that had been discovered in the new strike on the frog Eclipse Mining Company. The first assays of specimens of ore taken from the new shaft on the northeast side of Bonanza

assays of specimens of ore taken from the new shaft on the northeast side of Bonanza Mountain went as high as \$7,000 and \$8,000 to the ton, and there has been a later assay of more than \$9,000. Average assays show values of \$300 a ton for everything in the shaft. A few weeks ago Supt. Lester, in prospecting over that part of the company's property, discovered surface showings that panned unusually high. He thereupon decided to cut a trench to determine whether he had happened on a new vein. Each additional panning showed better than the one before, and it was immediately decided to sink an incline shaft, following the course of the ore body. The shaft has now reached a depth of forty feet, and every bucketful that has been brought to the surface shows the same high values.

The Bullfrog Eclipse Mining Company, which owns the ground in which this strike was made, is the corporation that was formed after "January" Jones of Goldfield brought two warring factions together. Two men were ready to affirm, and they were supported by witnesses, that they had located and staked out the claims, and both sides insisted that it was done on the same day. There was promise of endless litigation until Mr. Jones succeeded in effecting an amicable arrange of the corporation and John S. Cook, banker of Goldfield, treasurer. Before any strike was made on the property 100,000 shares of the treasury stock of the par value of \$100,000 the property in the bound of the company began stoping ore out of its extensive underground workings, which has been developing and exploiting during the last four years, and all the blus at the smelter sare filled with are, much of it first class, and both sides insisted that it was done on the same day. There was promise of endless litigation until Mr. Jones succeeded in effecting an amicable arrange, of the company began to the property in the bound of the company began at the property in the property in the property in the property in t 26000 Am Writ Pa 5s..... 87 87¹4 87 87 15000 Atchison 4s, w 1..... 10234 10234 10234 10234

MORE GOLD FINDS IN NEVADA.

THE BULLFROG DISTRICT NOW TAKING THE LEAD. Average of \$725 in a Sixty Ton Shipment

> From the Montgomery-Shoshone Mine Turnagain Arm, Alaska, Attracting

Attention by its Placer Diggings.

RHYOLITE, Builfrog Mining District, Nev.,

July 6.—It is 110 degrees in the shade here for an average of twelve hours each day. The scorching rays of the sun, in an altitude of 8,200 feet, have affected even the most nervously energetic of the miners here. Notwithstanding, sensational developments pile upon one another every day in this district, the latest being the report Just received here of the official returns from the Reno smelter of the last sixty tons of ore shipped from the Montgomery-Shoshore mire. The total figure for the remarkable shipment is \$43,500, or an average of \$725 for the whole 60 tons. The separate figures, however, are more instructive, as thirty tons reached an average value of \$1,150, while the other thirty averaged \$300. In the selection of this ore for shipment the company has thrown out on its dump tons upon tons of ore that will, run as high as \$200, which will be reserved in bulk until there are better facilities for transportation or until the com-

pany has its own will.

Another shipment of high grade ore will be made during the coming week. The men are now working in the drifts and in the winze that has been sunk from the main tunnel. In the latter operations have ceased for the present, all hands being engaged in taking out the rich ore. The face of the tunnel, which is now 160 feet in the mountain, is in the same rich tale which the company encountered when ore was first struck. The deep, is in tale mixed with quartz, carrying high values in gold and considerable silver. It was from the winze that the ore for the

from the tunnel of the Shoshone-Polaris mine, which adjoins the Montgomery-Shoshone on the southwest side. The course of the rich vein, as far as it can be traced, shows that it extends for a distance of 1,900 feet in the Montgomery-Shoshone property and 1,200 in the Shoshone-Polaris. If, as the croppings on the mountain indicate and the mining engineers and experts believe, the vein continues through the holdings of the Montcomery Mountain Mining Company on the south end of the mountain, the last named company will have 2,100 feet of it, making the total length of the vein 5,100 feet. The tunnel on the property of the Montgomery Mountain Mining Company is now in more than 140 feet. R. A. Fitz Gibbon, a mining engineer from New York, who came here to inspect the district, and who was all over Montgomery Mountain yesterday, is of the opinion that the vein should be reached in the next sixty feet, while Supt. Macbeth

pah. He has interested Philadelphia capitalists

stockholder is Senator T. L. Oddie of Tonopah, He has interested Philadelphia capitalists in the company.

While sensational, this strike on the Hobo fraction is only one of a series of important ones which have been made on Bonanza Mountain in the past three months and which goes far to verify the prediction of the experts who prospected the entire surface of the mountain, from the end owned by the Gibraltar Mines Syndicate on through the holdings of the Eclipse and past the property of the Denver Bullfrog Mining Company, that Bonanza Mountain has more surface indications of proving a great ore producer than any other stretch of territory known in recent mining history. Ten distinct ledges have now been traced in the mountain—six in the Equitable group, owned by the Gibraltar Mine's Syndicate; three in the Eclipse properties, and the famous vein of the Denver mine. In the latter there is a five foot width of \$300 ore that can be traced down the side of the mountain for 400 feet, and there are croppings on the surface for 1,500 feet. So many shafts are being sunk on Bonanza Mountain and so much ore is being disclosed that it now appears to be simply a quarrying proposition. R. A. Fitz Gibbo, consulting engineer, who has been visiting here in the interest of Eastern capital, summed it up by saying:

"From what I saw it is no difficult matter to prophesy that a very few years will make a marvellous change. If I should go back there in tive years, I believe I should not be able to recognize the contour of Bonanza Mountain. It is so completely honeycombed with ledges and veins of gold bearing ore that it will simply be a case of taking it out in blocks."

While this was Mr. Fitz Gibbon's first visit while lends of Nevada he has had lengted.

able to recognize the contour of Bonanza Mountain. It is so completely honeycombed with ledges and veins of gold bearing ore that it will simply be a case of taking it out in blocks.

While this was Mr. Fitz Gibbon's first visit to the mine lands of Nevada, he has had long experience in Alaska and Mexico. He came here as the special commissioner of men of New York who are seeking investment and who wanted to have a report on this district at first hand.

The strike made on Monday on the Bullfrog Steinway, in which \$520 ore was found in the bottom of the shaft at the fifty foet level, is considered of the utmost importance. The entire bottom of the shaft is in this high grade ore, and it is as yet impossible to tell how wide the vein is. It is also impossible to ascertain exactly in what direction the vein runs, but the trend is believed to be about north and south. The formation is rhyolitic quartz. Free gold can be seen with the naked eye in the rock that is being taken from the bottom of the shaft, and the character of the formation indicates that the deeper the men go the better it will get. The property of the Bullfrog Steinway lies on a hill to the north and west of Montgomery Mountain, and the place where the strike was made is exactly 600 feet from where a shaft is being sunk on the property of the Shoshone National Bank Mining Company. The Shoshone National Bank S property surrounds the Bullfrog Steinway on three sides, and a shaft which is being sunk on the former is now down fifty feet, and is in manganese and quartz.

A few hundred feet from the Shoshone National Bank's ground, a strike is reported on the Scorpion claim. The Scorpion is on the flat, less than 1,000 feet from both Montgomery and Ladd mountains. About 1,000 feet away, to the eastward, in the wash between the two mountains, John McKane is sinking a shaft on the Crystal claim, owned by McKane and Charles M. Schwab.

RENO, July 10.—White Horse district, in Washoe county; is coming to the front, several good discoveries having been made re

the ton. The Monte Cristo.

Creeks. The mining on these properties has all been, with one exception, pick and shovel, at seven different places.

Mining was first begon in 1895 and has been carried on every year since. The gravel has averaged 25 cents a cubic yard, coarse gold. The working season for pick and shovel and hydravile plant is about stymonths forg. It is Mr. Cappel's intention to instal drekkers and steam shovels, saying that by this method the season will be practically all year long, so there is no great degree of frost to interfere. The coldest last winter was about 25 degrees above.

The building of the Alaska Central Railway, twenty-five miles of which is siteady completed and in operation, which will run near Mr. Cappel's mines, will facilitate transportations and make large operations in the erritory adjacent to the line practicality and the producing mines are cleaned to the creeks near Hope on which there are producing mines are cleanered to the line practically and six Mile proper. There are twenty-live producing mines on these streams.

Some of the creeks near Hope on which there are producing mines are leasurrection. Bear and Palmer

The recourses have only been touched but sufficient work has been done to warrant the testating of several large and expensive plants. This is an area, 10x20 miles in extent containing gold in paying quantities, wood and water in abundance, and possessed of an excellent climate.

J. H. Conrad of Moutava has returned from a successful trip in the Wins Arm country, a quarty proposition for \$250,000 that surpasses.

found, aside from the Homestake.

WASRINGTON.

SRATTLE, July 10.—The Apex mine, Index district, has been shipping regularly to the Crofton smelter, Vancouver Island, and the mine is showing up better than at any time in the last year. The ore is not only improving in quality, but it is increasing in quantity, entitling it to occupy first position in what is regarded as one of the leading districts in the State. The owners have succeeded in securing money enough to open up the property in first class manner.

Miller River district, which adjoins the Apex, is also showing up well. It is accessible and can handle a force of from 50 to 50 men to advantage. The ledge is from 60 to 70 feet wide, with prospecta for still greater width as depth is attained. There is orgenough in sight to keep a large smelter constantly employed, and Silver (reck is in constitute of the description of the output.

excellent climate.

J. H. Conrad of Moutava has returned from a successful trip in the Wing Aran country, Upper Yukon, where he says he has secured a quartz proposition for \$250,000 that surpasses anything in the country. The capacity of the mine is 100 ions a day, and the ore runs \$100 a ton in gold, and silver. A plantcapable of handling this much has been ordered and too men will have steady employment. The mine is accessible at all seasons.

The Arctic Sun intres on Prince of Wales Creek and Bering Sea are now being examined by Eastern experts for their tin values. Tin has been fraced for about four miles on these properties and considerable ore was brought out last fall from Buck and Prince of Wales creeks. It is thought these properties will change hands this summer, as prices are reasonable, considering the magnitude of the ledges and the character of the ore. Sixty tons were shipped to Sweden last winter, finding a ready market.

Fort Wayne, Ind., people who have been engaged for several years past in the Kayak ore district are meeting with unusual success this season and are now compelled to enlarge their facilities, the steamer sailing to-night for Valdes taking out several steam pumps. They expect to have a number of producing wells this season. Experienced oil men who are operating in this district say they would not be surprised to see a number of flowing as well as pumping wells this season in the Kayak district.

CALIFORNIA. dition to add materially to the output."

SAIT LARE, July 10.—The physical condition of the Carisa mines, at Tintic continues to improve. The output with every shift and copper ores now exposed demonstrate that the property will close the season as one of the most productive in the district.

The Honerine drain tunnel at Stockton has attained a depth of 8,200 feet and will be completed in September or October. The mill is still taking values from the tailings left by an old plant.

BRITISH COLUMBIA.

left by an old plant.

BRITISH COLUMBIA.

COTTONWOOD, B. C., June 30.—The Carlboo Mining District of British Columbia, about three hundred miles north of Ashcroft, is taking on a new boom in mining. Work is being carried on very largely by the Great Carlboo Gold Company of New York, the Carlboo Consolidated Company, Ltd., of London, the Laird Mining Company on Williams Creek, a Chicago corporation, and by the Slough Creek Mining Company Ltd. of Glasgow, Scotland. The two former companies adjoin and their properties are situated on Lightning Creek, a Lightning Creek, as been a great producer of gold. During the working of the upper two miles of the stream with primitive machinery the production has run over \$1,000 a linear foot on bedrock in a narrow channel, and if the stream adheres to its old record, which recent drilling tests made by the Great Carlboo Gold Company have indicated, a heavy production is looked for in the near future which will surpass all others this season.

The Government records show a pro-BRITISH COLUMBIA.

CALIFORNIA.

CALIFORNIA.

SAN' FRANCISCO, July 10.—Pleasant Cañon, in the Farament range, in Inyo county, is being thoroughly prospected. From Pleasant Cañon to Redland Cañon, a distance of nine miles, several rich veins have been struck. On the Mineral Ranch mine Charles Anthony with a small mill has worked out more than \$100,000 within a few years. The ore averages 25% to the top.

future which will surpass all others this season.

The Government records show a production of the Van Winkle mine on Lightning Creek, which was operated with crude machinery in the early 70s, of 1,570 ounces of gold a week, amounting in cash approximately to \$27,740.87. Other claims yielded from 800 to 1,200 ounces a week.

Deep gravel mining had ceased here for a number of years owing to difficulties and conditions which arose and could not be controlled with primitive machinery, but since the companies above mentioned began operations, their plants being equipped with modern machinery especially adanted for deep gravel mining, Cariboo has taken on a new lease of life.

C. F. U. WHACKS DEPEW.

Labor Men Call on Him to Resign From the Senatorship. Just as the delegates of the Central

with a small mill has worked out more than \$100,000 within a few years. The ore averages \$35 to the ton.

In the Home mine, near Grass Valley, Nevada county, Supt. McFall has reopened the old Gluyas shaft, which was sunk in the early '80s under the direction of a well known mining engineer named Gluyas. At that time some very rich ore was taken out, and the indications are that nuch was left in the shaft, which can now be worked profitably.

The deep mines on the mother lode in Amador county have been great producers, and though the ore is low grade it is now worked at such low cost that ore which averages \$3 may be milled at a good profit. The Keystone mine in the last fifty years has had \$15,000,000, the Eureka \$20,000,000, Rennedy \$10,000,000, and Oneida about \$40,000,000. Not one of these mines is worked out, and several have been paying dividends recently.

The Arondo Gold Mining Company, Inyo county, operating in the Argur Mountains, has expended \$75,000 in development work. The shaft is being sunk to the 300 foot level. During last year 1,505 tons of ore were put through a small cyanide plant and netted \$15,835. Federa ted Union were becoming drowsy at its meeting yesterday Bernard Feldman, delegate of the Shirt Starchers' Union, sprung a preamble and resolutions referring to the Equitable scandal and denouncing the officers of the Equitable Society, special reference being made to Chauncey M. Depew. Before the reading of the resolutions was ended every delegate was wide awake. The resolutions were as

Whereas, The recent disclosures in connection with the criminal misappropriation of the Equitable Life Insurance Company proved Life Insurance Company, but also the State authorities, are guilty of gross neglect and fraud, and that the working men and women are greatly interested in this matter, it being established beyond a doubt that the pre-

established beyond a doubt that the premiums which have enabled the gentlemen "higher up" to prosper and live in luxury are largely contributed by the laborers also; therefore, be it Rescired. That the C. F. U. in meeting assembled, mark the disgraceful tactics of the men prominently connected with the above named insurance company as dishonest and criminal, and declare in most emphatic words that the misappropriation of funds belonging to widows and orphans is a crime which deserves the severest punishment and be it further.

serves the severest punishment and be it further Resolved. That we express our severest in the office of the State Superintendent of Insurance at Albany, who withheld from the public the truthful state of affairs in the gigantic steal, and that we call upon the "joker," Chanucey M. Depew, as the representative of the Empire State in the national executive hall, to resign his office because of the criminal part he played in connection with the case. Organized labor regards "the peach" as belonging to a rotten political species which has been trampling the rights of the people while he himself is seated safely on the infamous elephant.

A demand was made that the resolutions

A demand was made that the resolutions A demand was made that the resolutions be read over again by the recording secretary, which was acceded to. Then a delegate asked if they bore the union label. The chairman retorted that the resolutions were written and not printed, and therefore did not need the union label.

"Does the delegate bring the resolutions are the invited," health a man at the back.

from his union?" shouted a man at the back

the surface. After an expenditure of millions they demonstrated that their judgment was correct.

It appears that the report of a big oil strike in the wells of the Swift Current Oil Company, in the Swift Current district in the northern part of the State, has not at all been exaggerated. The flow now amounts to 100 barrels a day, and as all storage capacity has been filled the well has been capped until further provision for storing can be made. The flowing well is 804 feet deep and is two and a half miles from the mining camp of Altyn and forty-three miles northwest of Browning, on the Great Northern Railway.

George H. Savage, manager of the Milwaukee Gold Extraction Company, in the Red Lion district, says the new mill will be ready for operation by the 1st of August. A tramway is being built to transport the ore from the mine to the mill, a distance of 3,800 feet.

The Rayen Mining Company, in driving a crosscut from the Buffalo to the Snoozer, has cut the Snoozer vein at a depth of 1,200 feet. The vein is of good width and carries 6 per cent. copper ore. A crosscut at the 800 foot level of the Buffalo also opened two veins, one of which is seven feet wide and the other four feet, but the ore is not so good as in the vein on the 1,200 level. The Rayen was formerly a silver producer, and all the ore above the 600 level was silver and gold bearing.

A rich gold find has been made near Homestake, a station on the Northern Pacific Railway east of Butte. While searching for a stray cow a few days ago, Nannie Brown, a little girl, stumbled into a gopher hole out of which had been thrown several small pieces of quartz. Noticing the bright glitter in the fragments, the girl carried them home and subsequent assays showed that the quartz carried a gold valuation running as high as \$1,000. Three prospectors were taken to the gopher hole by the Brown girl and after disging down a short distance they uncovered two distinct veins. Two shafts have been sunk and bodies of high grade ore uncovered. Thousands of dollars wort Feldman said that the resolutions were his own, and a motion was made to indorse them by Daniel S. Jacobs of Cigarmakers' Union No. 13. Several delegates who had been ready to speak to them were fdgeting in their seats, but when some of them got up a motion was made to table the whole matter. The motion to table was lost and the chairman put the motion to indorse the resolutions, which was declared carried. no time being allowed for debate on the

WILL END COOPERS' STRIKE.

Employers Unless They Return to Work. The coopers who went on a general strike in the breweries of the city four or five weeks ago will meet to-night to consider a proposition to declare off their strike and return to work pending arbitration. A committee appointed to get a conference got the flat answer that there could be no conference unless the men returned to work

The committee reported vesterday that The committee reported yesterday that they had seen Louis Schramm of the India Wharf Brewing Company, who is a prominent member of the Brewers' Association. Mr. Schramm, when asked whether all the coopers would get back, told the committee that some of the brewers had done away with the coopering work at their breweries altogether and were getting it done in the large cooperages, but as many of the men as possible would be taken back. It was said last evening that they will call It was said last evening that they will call off the strike to-night in all the breweries throughout Greater New York.

ACTORS' THREAT.

Feud Between Variety Players' Unions Aired at C. F. U. Meeting.

A feud which has arisen between locals and 5 of the Actors' National Protective Union, composed of variety actors, was aired at yesterday's meeting of the Central Federated Union. No. 1 is com-Central Federated Union. No. 1 is composed of English speaking actors but has a number of Hebrew actors also, while No. 5 is composed altogether of Hebrews.

James Barry of No. 1 complained that the men of No. 5 had ordered a strike in a Bowery music hall because some of the members of No. 1 were acting there.

Sam Riddow delegate of the Hebrew Actors' Union No. 5, said that Barry was doing all he could to take the work away from the members of his union. He continued:

from the members of his tinion. He constinued:

"We have only seventy members and have nine or ten places only to go to for work, while he has hundreds of places to pick and choose from. If we let him in our territory we will have nothing to do. When I told him this he said, "To hell with you."

with you.' "Barry said that the Hebrews were trying to build a Chinese wall around their theaters. He added:
"But if he says I lie——"
"But if he says I lie——"

The delegates waited to hear what would happen, and Earry said: "He's got a lot of gall."

The chairman told the delegates that of gall."
The chairman told the delegates that complaints should be made to the executive

IN THE BLACK HILLS.'

Deadwood, S. D., July 11.—One of the most interesting districts in the hills is that lying on and about Custer Peak, ten miles from here. It was in this region a few years ago that the famous Finlander strike was made, when the prospector, overcome with loy at the remarkably rich ore which he found, died from the effects of his violent emotion. The Finlander group of claims, as they are still known, have been bought by a company composed of Black Hills and Chicago men, and the company is known as the Northwestern. Although the shaft has not yet attained a depth of fifty feet, the showing is good.

Another company whose ground lies near that of the Northwestern is the Custer Peak. Last week in a west crosscut from the 200 foot level somewery rich copper ore was found. Samples show an abundance of native cooper, and although no assays have been made yet the ore will run high. The vein in which it was found runs northeast and southwest, while the drift runs west, showing that the vein is struck on the angle. Pan tests show that the cre will also carry at least \$5 a ton in gold.

The richest strike that has been made in The richest strike that has been made in

SEATTLE, Wash., July 10.—Among the arrivals from Alaska in the city is G. T. Cappel of Columbus, Ohio, the owner and operator of large placer mines located near the head of Turnagain Arm, Cook Inlet. Mr. Cappel has 2,580 acres of gravel deposit on Granite Creek, East Fork, Six Mile and Bench

MINE PUMPS.

STATION AND SINKING MINING PUMPS.

THE SLOGAN OF THE CAMERON—
"CHARACTER THE GRANDEST THING."
Over 40,000 CAMERON pumps in daily satisfactory use all over the world give tangible proof of their merit and confirm the claim for their superiority over all others. They are conceded to be the most durable, reliable and effective mining pumps on the market to-day, and white often indicated are never equalled. For proof, inquire of any mining engineer; for the latest catalog "C" and prices, write any of our resident agents or direct to the
